

# Privacy Policy

## Effective Date

22 September 2017

## Introduction

This Privacy Policy relates to the iOS app RunZombieRun's integration with the Health app in iOS.

## Who We Are

We are an independent app developer based in Singapore. We can be contacted at [support@seesawapps.info](mailto:support@seesawapps.info)

## Information We Collect and Use

All data displayed in the app (distances, speed and pace, steps count, flights climbed) is gathered from inbuilt parts of iPhone, mainly the motion coprocessor, via the CoreMotion Framework. User's location data is gathered via the CoreLocation Framework with user's permission. All data is for display in the app only and all data stays in the device as far as the app is concerned. The app does not send any data out to any server within our control or any third party servers. There are only 2 occasions where RunZombieRun sends out data: (1) At the start of a run when it sends location data to Apple's server to retrieve the street address of the starting point; (2) When users choose to share their selected routes of zombie adventures with friends or on social media.

For integration with Health app, RunZombieRun only collates relevant data into workouts and writes to Health app, with user's permission. RunZombieRun does not read from Health app.

## Disclosure and Transfer of Information

As explained in the previous section, RunZombieRun does not disclose or transfer any information to anyone, other than writing collated data as workout to Health app, under user's permission.

## Enforcement

We regularly review our compliance with this Policy. Please feel free to direct any questions or concerns regarding this Policy to [support@seesawapps.info](mailto:support@seesawapps.info)

## Privacy Policy Updates

We may update this Privacy Policy from time to time without prior notice. You can determine when this Policy was last revised by checking the Effective Date. We encourage you to periodically review this privacy policy to ensure you understand our privacy practices.
